

A lot of you asked me about the house search and how I made the google sheet. I have shared my experience here. (This might or might not be the correct way but this is how I have searched for a house).

- Here are the numbers of landlords. I have compiled them all. You can tell them about your preferences (such as number of bedrooms/street in which you want the house/your budget) and they will provide you with any house leads if they have.
- Some of them are not on whatsapp so you might wanna call them according to EST timings.
- The basic procedure which I followed for house search was to talk to these landlords first, get the house leads and then I asked them for a video/virtual tour.
- Looked for their reviews on GISA. If I couldn't find the reviews then I talked with a lot of seniors about the landlords.
- Before finalising do take a virtual tour via video call. Talk to your seniors who might have lived there. Ask a friend who is in buffalo to go and look at the house. Look at the house on google maps/ google earth. Look how far the house is from the main bus stop. Ask for a bed/table chair in every room. Apart from that, ask for receipt after your payment because they might not return your security deposit so you need to have a proof that you paid the amount.
- From what I have seen there are houses varying from 280-500\$ in the south campus excluding utilities. I'm not very sure about the north campus as I didn't look for housing there.
